

# DISPLAY SCREEN EQUIPMENT POLICY

---

Our policy is to assess the risks to all habitual users of computer workstations and to reduce those risks to the lowest level possible. The following factors will be considered when carrying out risk assessments:-

- i. Stability and legibility of the screen
- ii. Contrast and brightness of the screen
- iii. Tilt and swivel of the screen
- iv. Suitability of keyboards, desks and chairs
- v. The work station environment
- vi. The user friendliness of the software

The HSE's Display Screen Equipment (DSE) workstation checklist is completed for every employee. Any subsequently identified additional equipment is obtained, and necessary adjustments made to equipment and furniture.
